Summer time heat!!

The summer season is upon us and it's time to thank about preventing dehydration and heat-related illness. The best time to consume fluids is before you are thirsty.—by the time you are thirsty, your body is already dehydrated. It's best to drink on a schedule when it is hot outside. Avoid drinks containing caffeine while in the sun or heat. These types of drinks stimulate the production of urine thereby promoting dehydration. The best drinks are water, or one of the many flavored sports drinks.

Have a safe summer!!
